Business Management Software**

Best Ecommerce & Business Software for Rising Businesses.

Bazrin is a leading software company providing POS, ecommerce, and business solutions tailored to modern needs. We empower businesses with smart technology that simplifies operations, enhances growth, and ensures long-term success.

Bazrin is an all-in-one business management software that helps businesses manage sales, inventory, payments, customers, and daily operations from a single platform. It's designed to make running a business simple, efficient, and hassle-free.

Bazrin offers powerful features to help businesses run smoothly and grow efficiently. Key features include:

- ✔ Point of Sale (POS) for fast and accurate billing
- ✔ Inventory management with real-time stock tracking
- ✔ Customer and supplier management
- ✔ Purchase, sales, and quotation management
- ✔ Secure payment and invoice handling
- ✔ Multi-store and branch management
- ✔ Expense and account tracking
- ✔ Sales reports and business analytics
- ✔ User role and permission control
- ✔ Cloud-based access with data security and backup

Dashboard Feature

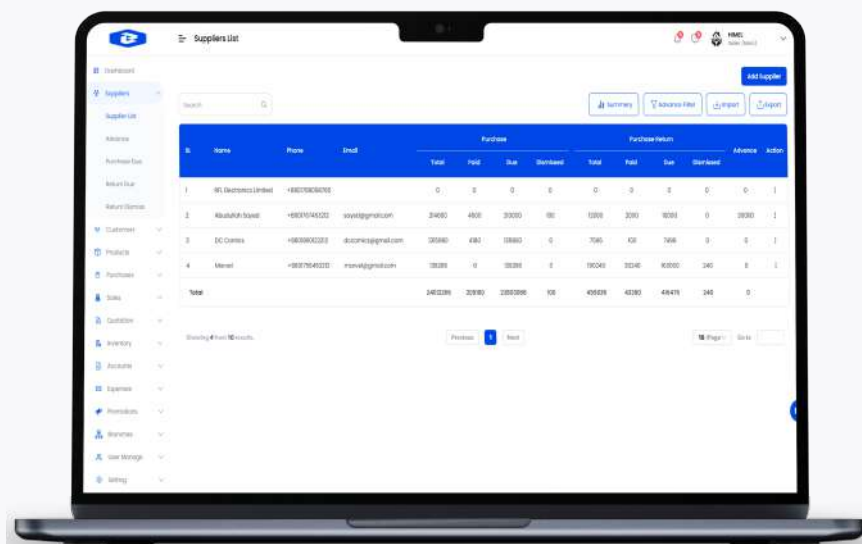

The Bazrin Dashboard provides a complete real-time overview of your business performance in one place. It helps you make quick, informed decisions without navigating multiple sections.

- ✓ View Today's Sales instantly to track daily performance.
- ✓ Monitor Customer Due and Supplier Due amounts to manage cash flow effectively.
- ✓ See Total Products count for quick inventory awareness.
- ✓ Analyze performance through Top 7 Product Sales Graph to identify best-selling items.
- ✓ View Today's Sales instantly to track daily performance.
- ✓ Monitor Customer Due and Supplier Due amounts to manage cash flow effectively.
- ✓ See Total Products count for quick inventory awareness.
- ✓ Analyze performance through Top 7 Product Sales Graph to identify best-selling items.

This centralized dashboard ensures better control, faster insights, and smarter business decisions—saving time and reducing operational hassle.

Suppliers Feature

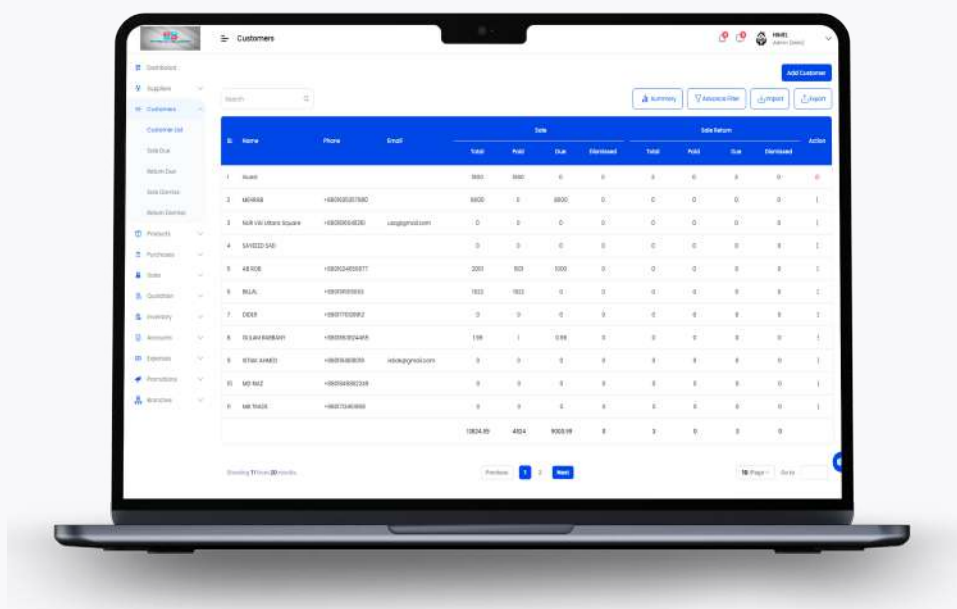

The Suppliers module helps you manage all supplier-related activities efficiently and maintain accurate financial records.

- ✓ Maintain a complete Supplier List with contact details and transaction history.
- ✓ Track Advance Payments made to suppliers for better payment planning.
- ✓ Monitor Purchase Due amounts to manage outstanding supplier payments on time.
- ✓ Manage Return Due for returned goods and pending adjustments.
- ✓ Use Return Dismiss to close or settle return-related transactions accurately.

This feature ensures transparent supplier management, reduces payment confusion, and helps maintain smooth procurement operations.

Customer Feature

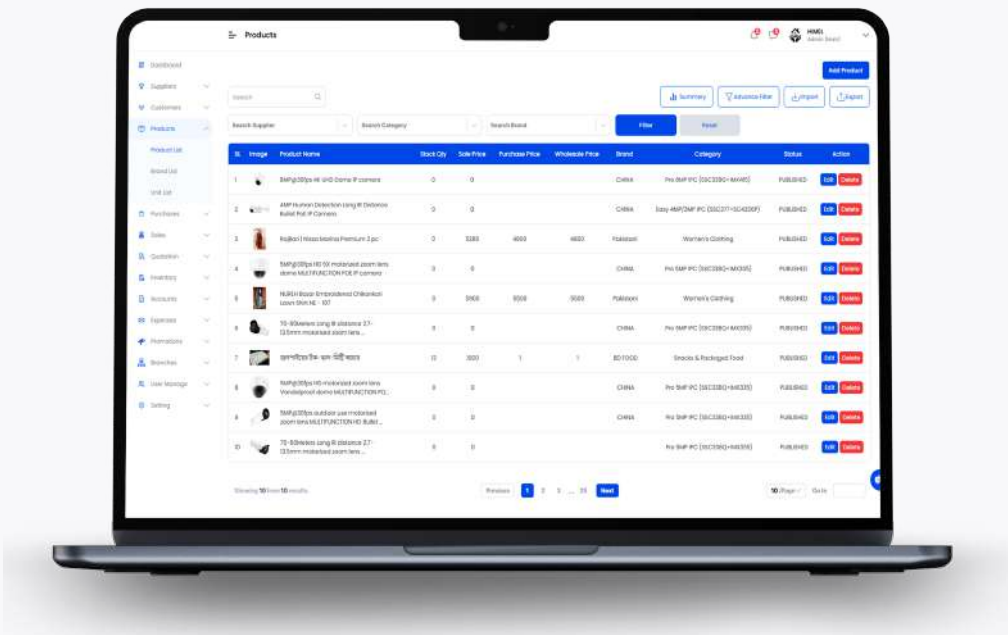

The Customer module helps you manage customer information and sales transactions efficiently while maintaining accurate financial records.

- ✓ Maintain a complete Customer List with contact details and purchase history.
- ✓ Track Sales Due amounts to manage outstanding customer payments.
- ✓ Monitor Return Due for returned products and pending adjustments.
- ✓ Use Sales Dismiss to close or settle completed sales transactions properly.
- ✓ Apply Return Dismiss to finalize return settlements and maintain accurate records.

This feature improves customer relationship management, ensures clear payment tracking, and helps keep sales and return data organized.

Product Feature

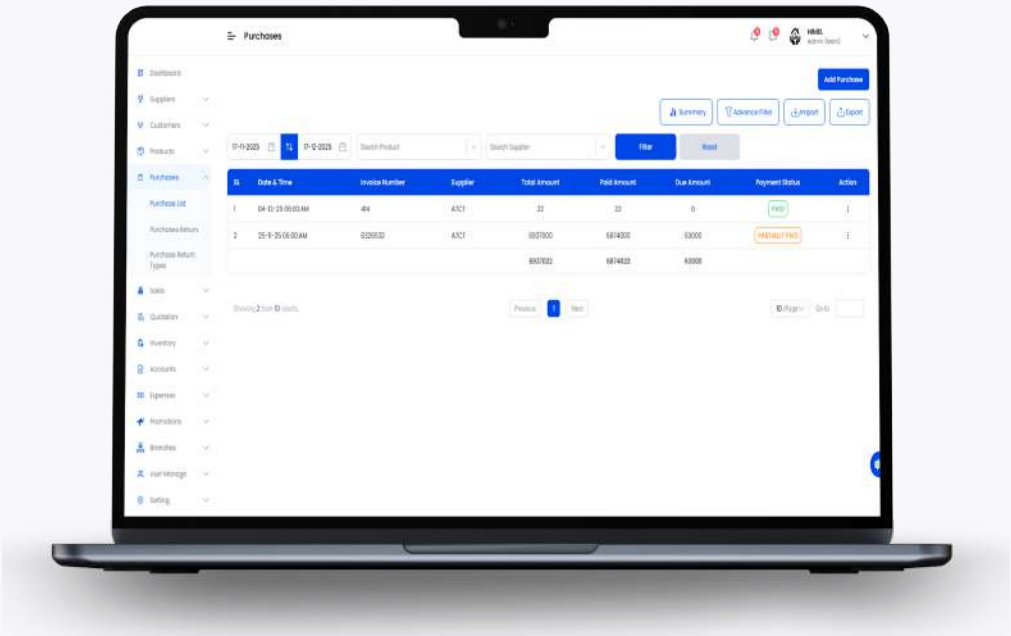

The Customer module helps you manage customer information and sales transactions efficiently while maintaining accurate financial records.

- ✓ Add Products easily with detailed information such as price, category, and stock level.
- ✓ Create Variant Products (size, color, model, etc.) to manage multiple versions of the same item efficiently.
- ✓ Add Warranty Information to track warranty periods and improve after-sales service.
- ✓ Maintain a structured Product List for quick search, update, and stock monitoring.
- ✓ Organize items using a Brand List for better classification and reporting.
- ✓ Define measurement standards through the Unit List (pcs, kg, liter, etc.) for accurate sales and inventory control.

This feature ensures organized product data, accurate inventory tracking, and improved product lifecycle management.

Purchase Feature

The Purchase module helps you manage all purchasing activities efficiently while maintaining accurate stock and financial records.

- ✓ Maintain a complete Purchase List with supplier details, purchase dates, and invoice information.
- ✓ Manage Purchase Returns easily for damaged or incorrect items and update inventory automatically.
- ✓ Define and manage Purchase Return Types to categorize returns and ensure proper tracking and reporting.

This feature ensures organized product data, accurate inventory tracking, and improved product lifecycle management.

Sales Feature

POS System to Help Your Business Succeed

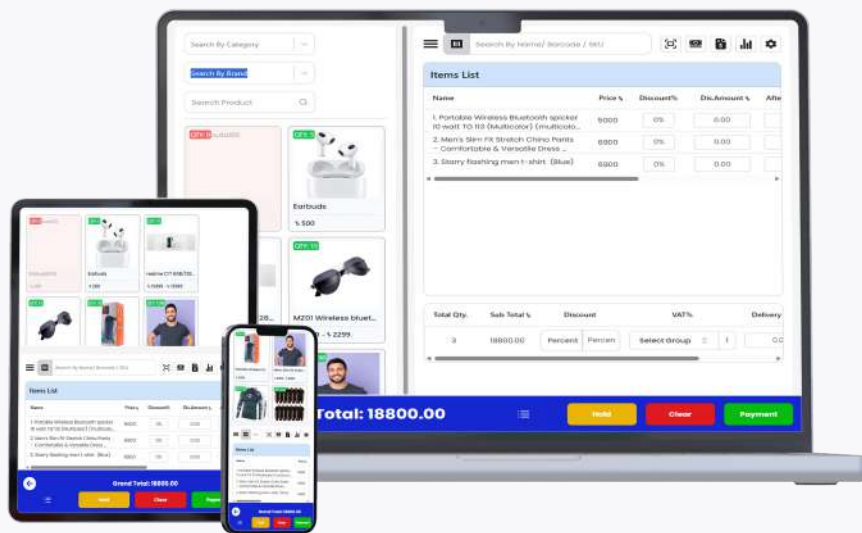

Transform your smartphone or tablet into a powerful POS system. Effortlessly manage sales, inventory, and staff while engaging customers and boosting revenue. From single shops to multiple branches, our tools keep your business running smoothly. Owner businesses with smart technology that simplifies operations, enhances growth, and ensures long-term success.

Turn your smartphone or tablet into a simple, powerful point-of-sale system.

- ✓ Easy billing makes sales faster and more efficient.
- ✓ User friendly interface allows anyone to operate smoothly.
- ✓ Real time sales tracking helps you stay updated on business performance.
- ✓ Customer management stores buyer details and improves service quality.
- ✓ Inventory integration automatically updates stock with every sale.
- ✓ Multi store support lets you manage different branches in one system.
- ✓ Digital receipts can be printed or shared instantly with customers.
- ✓ Secure transactions keep every payment safe and reliable.
- ✓ Discounts and offers can be applied quickly at checkout.

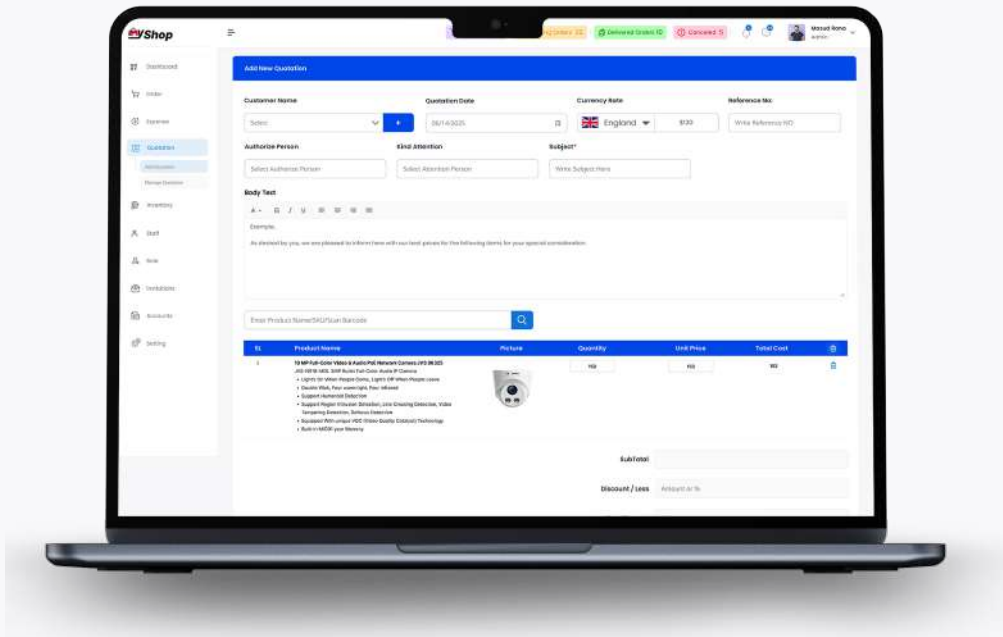

POS Payment Solution

- ✓ Multiple payment options allow customers to pay by cash card or mobile wallets.
- ✓ Secure transactions ensure every payment is safe and reliable.
- ✓ Faster checkout speeds up billing and reduces customer wait time.
- ✓ Real time tracking lets you monitor payments from the back office.
- ✓ Multi currency support makes handling local and international payments easy.
- ✓ Refund and adjustment support simplifies returns and exchanges.
- ✓ Offline mode allows payments even without internet connectivity.
- ✓ Customer friendly receipts can be printed or sent digitally.
- ✓ Analytics and reports provide insights into sales and payment trends.

Quotation Feature

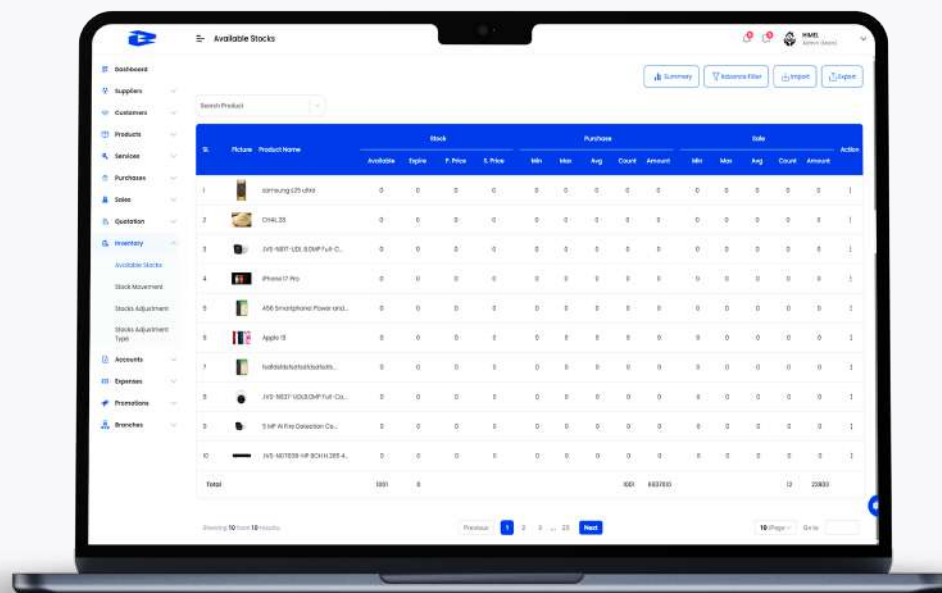

The Quotation module helps you create, manage, and convert quotations efficiently to streamline your sales process.

- ✓ Add and Manage Quotations easily with customer details, product pricing, and validity periods.
- ✓ Edit Quotations quickly to update prices, quantities, or terms before approval.
- ✓ Create Quotation Invoices instantly by converting approved quotations into sales invoices.
- ✓ Create Work Orders directly from quotations to ensure smooth order processing and task execution.
- ✓ Track quotation status to manage pending, approved, or rejected quotations effectively.
- ✓ This feature reduces manual work, improves sales accuracy, and speeds up order confirmation.

This feature reduces manual work, improves sales accuracy, and speeds up order confirmation.

Inventory Feature

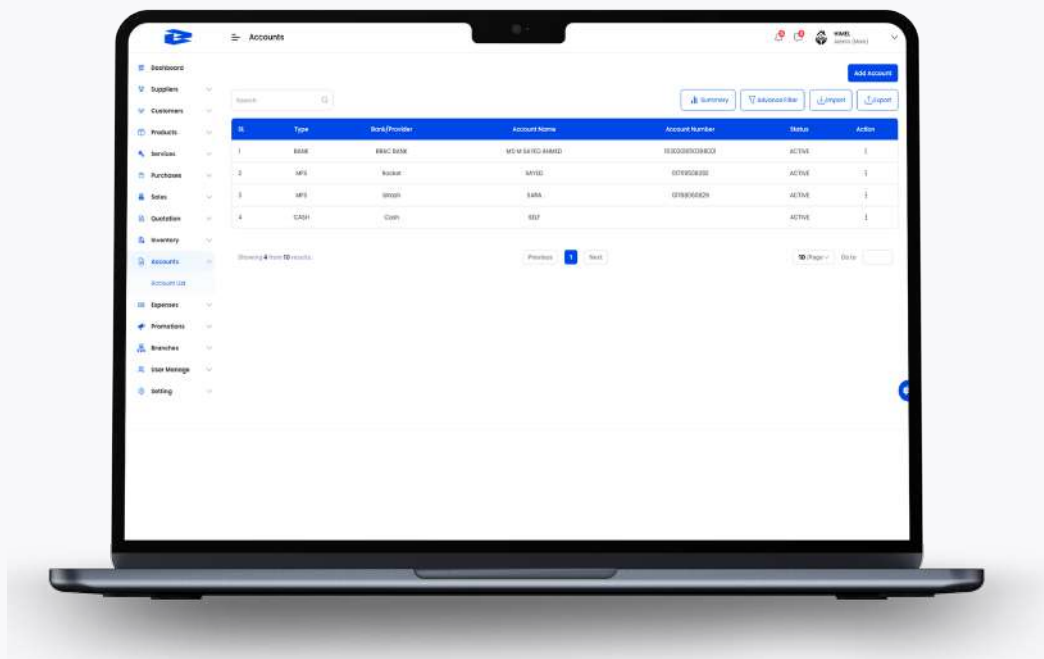

The Inventory module provides complete control over stock levels and movements to ensure accurate and efficient inventory management.

- ✓ View Available Stock in real time to prevent overstocking or stock shortages.
- ✓ Track Stock Movement for all incoming and outgoing products with detailed history.
- ✓ Perform Stock Adjustments to correct quantity differences due to damage, loss, or counting errors.
- ✓ Manage Stock Adjustment Types to categorize adjustments for better reporting and transparency.
- ✓ Add or Delete Stock Adjustment Types as needed to match business requirements.
- ✓ Create Stock Adjustments easily with proper documentation and reasons.
- ✓ Generate Stock Adjustment Vouchers for record-keeping and audit purposes.
- ✓ Delete Vouchers when corrections are required, ensuring accurate inventory records.

This feature ensures precise stock control, improves inventory accuracy, and supports better business decision-making.

Account Feature

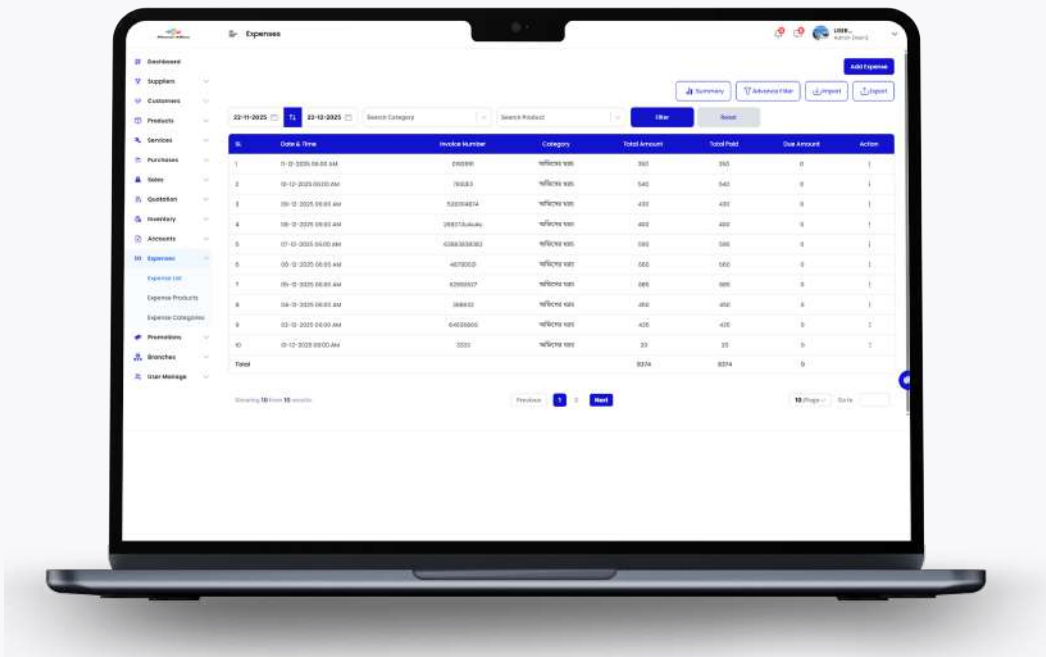

The Account module helps you manage financial accounts efficiently with complete control and transparency.

- ✓ Maintain a detailed Account List to view all business accounts in one place.
- ✓ Add New Accounts easily to manage cash, bank, or digital payment accounts.
- ✓ Edit Account Details to keep account information updated and accurate.
- ✓ View detailed Ledger Reports to track all transactions and account balances.
- ✓ Delete Accounts when no longer needed, with proper control to maintain data accuracy.
- ✓ Use the Active/Inactive Account Option to manage account availability without deleting records.

This feature ensures accurate financial tracking, better cash flow management, and clear accounting records.

Expenses Feature

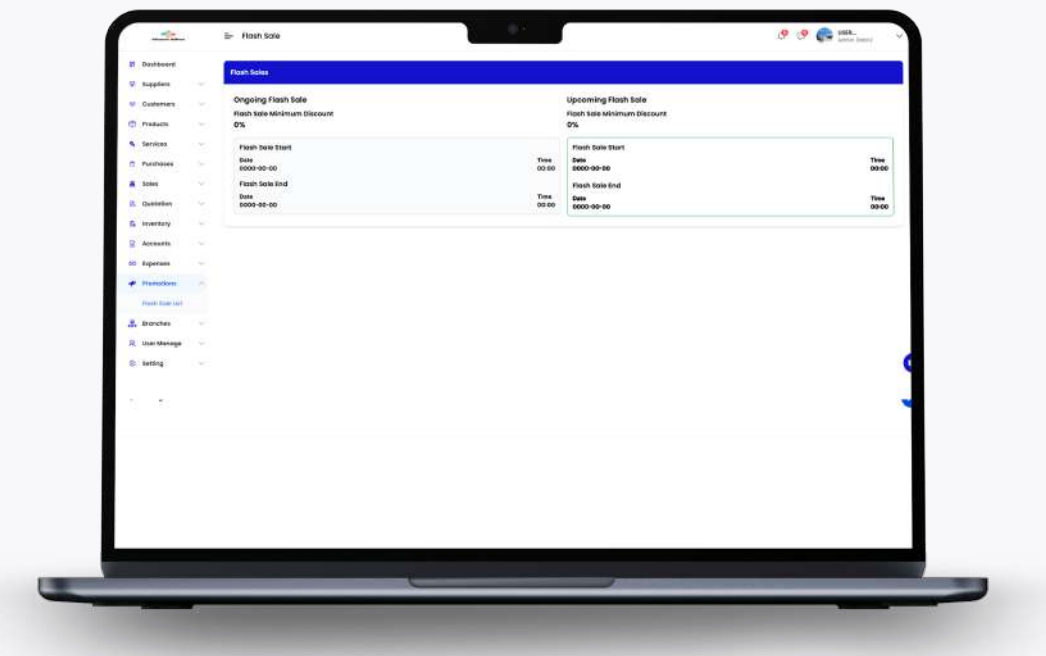

The Expense module helps you record, organize, and control all business expenses with accuracy and transparency.

- ✓ Maintain a complete Expense List to track all expense records in one place.
- ✓ Add Expenses easily with amount, category, and notes for better tracking.
- ✓ Create Expense Vouchers to keep proper documentation and audit-ready records.
- ✓ Edit or Delete Expenses to ensure accurate and up-to-date financial data.
- ✓ Manage Expense Products to track product-related costs efficiently.
- ✓ Add, Edit, or Delete Expense Products based on business needs.
- ✓ Organize spending using Expense Categories for clear expense classification.
- ✓ Add, Edit, or Delete Expense Categories to maintain structured expense management.

This feature provides better expense visibility, cost control, and improved financial planning.

Promotions Feature

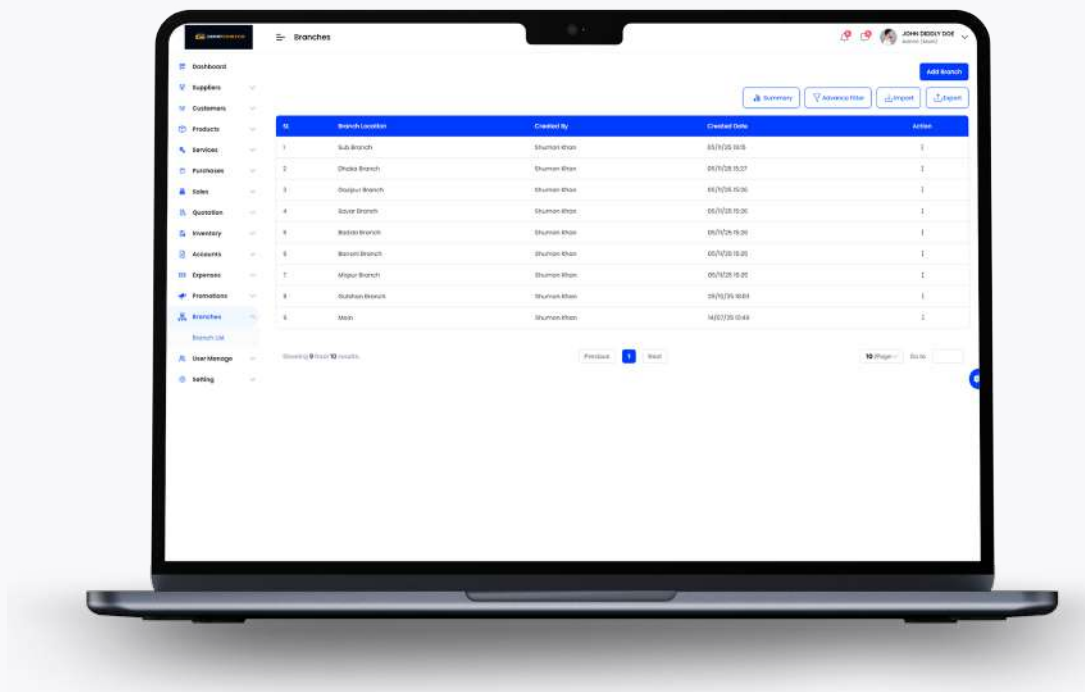

The Promotions module helps you create and manage time-based offers to boost sales and attract more customers.

- ✓ Create Flash Sales easily to promote products for a limited time.
- ✓ Manage Ongoing Flash Sales to monitor active discounts and performance in real time.
- ✓ Schedule Upcoming Flash Sales in advance for better campaign planning.
- ✓ Set a Minimum Discount Percentage to control offer limits and profitability.
- ✓ Define Flash Sale Start and End Date & Time to automate promotions without manual intervention.

This feature increases customer engagement, drives urgency-driven sales, and simplifies promotional campaign management.

Branches Feature

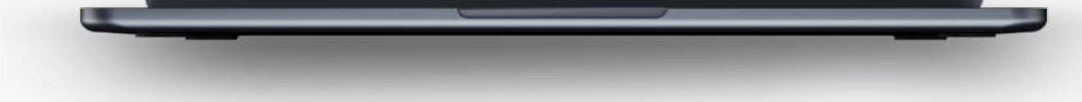

The Branches module allows you to manage multiple business locations efficiently from a single system.

- ✓ Maintain a complete Branch List to view and manage all business locations in one place.
- ✓ Add New Branches easily with branch-specific details for organized operations.
- ✓ Delete Branches when no longer required, ensuring accurate system records.

This feature enables centralized control, better coordination, and easy management of multi-branch businesses.

The Settings module allows you to customize and control system preferences to match your business operations.

- ✓ Configure Store Settings to manage business details, location, and operational preferences.
- ✓ Customize Invoice Settings including layout, branding, and information display.
- ✓ Manage Serial Settings for automatic invoice and transaction numbering.
- ✓ Set up Packaging Settings to define packaging options and costs.
- ✓ Enable the Point System to manage customer loyalty and reward programs.
- ✓ Configure VAT Settings to apply accurate tax rates and compliance rules.
- ✓ Activate Ask Password Settings for added security during sensitive actions.

This feature ensures system flexibility, compliance, and secure business operations.

Bazrin Multi Vendor Ecommerce Website

Bazrin Multi-Vendor eCommerce website is a powerful online marketplace platform that allows multiple sellers to list, manage, and sell their products from a single website. It provides vendor management, product listing, order processing, secure payments, and commission control in one integrated system. Admins can monitor vendors, sales, and performance, while sellers can manage their own stores, inventory, and orders independently. With a user-friendly design, real-time order tracking, and scalable architecture, Bazrin Multi-Vendor eCommerce helps businesses build and grow a successful online marketplace efficiently and securely.

Conclusion

Bazrin is a complete business management and eCommerce solution designed to simplify and automate daily business operations. It helps businesses manage sales, POS, inventory, purchases, customers, suppliers, accounts, expenses, promotions, branches, and user access from a single, easy-to-use platform. With powerful dashboards, real-time reports, secure payment handling, and flexible system settings, Bazrin enables better decision-making and smoother operations. Alongside the software, the Bazrin eCommerce website allows businesses to sell products online, manage orders, and reach more customers through a modern, user-friendly shopping experience. Together, Bazrin software and the Bazrin eCommerce platform provide an integrated, scalable solution that supports business growth, improves efficiency, and delivers a hassle-free digital experience.
